## FOREWORD.

---

This bibliography was undertaken by the News Department of the Woman's Committee of the Council of National Defense in order to make available for the work of the committee the growing mass of periodical and book publications on the conditions, the activities and the needs of American women in the war. For comparative purposes there have been included publications concerning women in other countries and a few relating to women's activities in other wars.

As the bibliography was prepared primarily for the use of the Committee, the titles have been classified and arranged according to its departments of work.

Grateful acknowledgment is made for assistance given by the following librarians and editors:

Miss Julia Laskey, chief cataloguer, Washington Public Library.

Miss Claribel Barnett, librarian, United States Department of Agriculture.
